Landscape Boulders

### Pea Gravel

Pea gravel is small screened rock, typically 3/8" in diameter, and comes in the gray, tan, reds, and browns. Pea gravel serves as a great decorative material and is commonly used in pebbled walkways, patios, and gardens.

### Screened River Rock

Screened River rock refers to river rock of uniform size ranging from 3/8" up to 2" in diameter. Screened river rock is used in landscaping and decoration, as drainage or fill, is used to make ready mix and has several additional construction applications.

### Pit Run River Rock

Pit Run refers to a naturally occurring blend of sands, soil, and rock sourced from quarries. This mixture is unprocessed and often more affordable. While pit run has a wide range of uses in construction projects, it is commonly used as fill material.

### Oversize River Rock

Oversize river rock is a very popular landscaping material. Though offered both as washed and unwashed, the washed variant can be harder to find due to the specialty equipment required to thoroughly clean the larger material.
